ATLANTIC CANADA'S SOLUTION FOR VALVES AND PROCESS INSTRUMENTATION SINCE 1987

Omnitech provides solutions ranging from single instruments to complete turnkey mechanical and automation packages for a wide variety of process and automation applications. We work closely with a broad network of trusted manufacturers to deliver cost-effective, engineered solutions tailored to our customers' needs.

MUNICIPAL MARKETS

Omnitech specializes in water and wastewater applications, supporting municipal systems with reliable instrumentation, water quality monitoring, and process control solutions. We work closely with operators, engineers, and maintenance teams to enhance system performance, maintain regulatory compliance, and deliver accurate, real-time data. Our support extends from commissioning and calibration through ongoing technical service.

INDUSTRIAL MARKETS

Omnitech supplies dependable industrial instrumentation and process control solutions designed to improve operational performance and reduce downtime. With a broad portfolio of proven products and strong technical support, we help customers resolve process challenges efficiently and achieve consistent, accurate results from installation through long-term operation.

OUR PRODUCTS

- Flow Meters
- Transmitters
- Level Sensors
- Actuators
- Pressure Gauges
- RTDs
- Thermocouples
- Positioners
- Rupture Disks
- Data Loggers
- Belt Scales
- Gas Detection
- Analytical Sensors
- Butterfly Valves
- Ball Valves
- Check Valves
- Plugs Valves
- Gate Valves
- Control Valves
- Pressure Reducing/Relief Valves
- Air/Vacuum Valves
- Solenoid Valves
- Pinch Valves
- Specialty Valves
